<https://github.com/ductree224/TVOnline>

A platform connecting employers and job seekers, allowing job postings, job searching, and profile management.

- **Technologies Used:** ASP.NET MVC, Entity Framework Core, SQL Server, Bootstrap 5, AJAX, Git.
- **Role:** Backend and UI Developer.
 - Developed and implemented business logic using ASP.NET MVC.
 - Designed and built user interfaces with Bootstrap.
 - Implemented a chat feature with the admin using AJAX.
 - Integrated user authentication and role-based access control for job seekers and employers.
